Message From President Director

Dear Members,

Xin Nian Kuai Le !! Have a prosperous and healthy new year to all the Members who are celebrating. I hope everyone has come back safe from their travels.

A lot has happened in the last few months, we lost our dear founder DR (HC) Ir. Ciputra. Our deep condolences and may your great spirit in golf always be with us.

Last December, our PIK Course received the prestigious Adikarya Wisata Award. This award is the highest appreciation for tourism industries for the quality, service, achievement, dedication and contribution. Thank you to all the staff at PIK Course for your support in giving the very best service.

Special recognition goes to all the members who participated in our Christmas Wish Program. On behalf of Damai Indah Golf, I would like to sincerely thank each and every one of you who donated to the local orphanages. Your gifts were a great blessing to the kids.

We are continually working to keep our golf courses always in great condition by conducting course maintenance program regularly; such as aerator and top dress green, reshaping fairway, leveling tee box and fixing drainage in rough area.

Continuing our efforts in developing Junior golf in the region, The Ciputra Golfpreneur Junior World 2020 will return at our PIK Course. We are all very excited to prepare the event which is scheduled in April 28 – 30, 2020.

Thank you to our dear and valued members for your kind attention. Happy Golfing!

DIG CHRISTMAS WISH PROGRAM

As one of the Club's programs to support orphanage children around the BSD and PIK Course to welcome Christmas and making their wishes come true, in December 2019, the Club conducted a Christmas Wish Card program where members can contribute by choosing one of the children's Christmas wishes cards and make it come true. The program went well and we received a lot of support from members. All gifts have been received by the children.

Thank you for your contribution in making the Christmas wishes of many of the orphanages' children come true.

Golf Course Maintenance

Sawo Duren, The Golden Green

Sawo Duren, Si Hijau Keemasan

By Robby Chandra – Landscape Supervisor BSD Course

The golf course landscape which is dominated by a stretch of turf grass will feel boring if it is not equipped with a combination of ground cover, bush, shrub and trees. The combination of height, shape and variety of plant colors gives the impression of a natural and not monotonous. Examples of plant diversity in a landscape can be found in tropical forest landscapes. Unlike subtropical forests which tend to be uniform, tropical forests show perfect gradations of height, shape and color of plants. This tropical forest landscape is the basic concept for developing landscape design of Damai Indah Golf - BSD Course.

Lanskap lapangan golf yang didominasi hamparan rumput akan terasa membosankan apabila tidak dilengkapi dengan kombinasi groundcover, semak, perdu hingga pohon yang beragam. Kombinasi ketinggian, bentuk dan warna tanaman yang beragam memberikan kesan natural dan tidak monoton. Contoh bentuk keragaman tanaman dalam suatu lanskap dapat kita temui pada lanskap hutan tropis. Tidak seperti hutan subtropis yang cenderung seragam, hutan tropis memperlihatkan gradasi ketinggian, bentuk dan warna tanaman yang sempurna. Lanskap hutan tropis ini menjadi konsep dasar pengembangan desain lanskap Damai Indah Golf – BSD Course.

The choice of plants is an important factor in designing landscapes that refer to the concepts. One type of plant that is cultivated in Damai Indah Golf - BSD Course is a sawo duren tree. The tree with the latin name *Chrysophyllum caimito* has a rounded canopy shape with a moderate leaf density. The dominance of dark colors on the leaves will look contrasted when combined with other trees with brighter leaf colors. Distinctive characteristics of this tree are the color of the leaves which are dark green on the top side and golden green on the bottom side. The difference in color on both sides of the leaves shows the color change in the canopy when blown by the wind.

*Pemilihan jenis tanaman menjadi faktor penting dalam mendesain lanskap yang mengacu pada konsep. Salah satu jenis tanaman yang dibudidayakan di Damai Indah Golf – BSD Course adalah pohon sawo duren. Pohon dengan nama latin *Chrysophyllum caimito* ini memiliki bentuk tajuk bulat dengan kerapatan daun sedang. Dominasi warna gelap pada daun pohon ini akan terlihat kontras bila dikombinasikan dengan pohon lain dengan warna daun yang lebih cerah. Karakteristik yang khas dari pohon ini adalah warna daunnya yang hijau gelap pada sisi atas dan coklat keemasan pada sisi bawah. Perbedaan warna pada kedua sisi daun pohon ini memperlihatkan perubahan warna pada tajuknya apabila tertiup angin.*

In addition to the uniqueness of the canopy color, sawo duren is also a fruit tree that is fit for consumption. The sweet and slightly sour taste of it is no less delicious than other popular fruits. This tree bears fruit once a year, usually occurring between July to September.

Selain keunikan dari warna tajuknya, pohon sawo duren juga merupakan pohon penghasil buah yang layak untuk dikonsumsi. Rasa buah sawo duren yang manis dan sedikit asam tidak kalah nikmat dengan buah-buah lain yang lebih populer. Pohon ini berbuah satu kali dalam setahun, biasanya terjadi antara bulan Juli hingga September.

This fruit is not found in the fruit market because it does not last long if stored and should be consumed immediately after being picked. When we want to pick sawo duren we need to know the characteristics of which fruit is ripe. In general, ripe fruits that are ready for consumption are more tender so they are easily split by hand like splitting mangosteen. BSD Course has 2 types of sawo duren those that are red when ripe (on hole 5) and those that remain green when ripe (on hole 10). Varieties in hole 10 generally have a sweeter taste.

Buah ini tidak ditemukan dipasar buah karena tidak tahan lama jika disimpan dan sebaiknya langsung dikonsumsi setelah dipetik. Saat hendak memetik buah sawo duren kita perlu mengetahui ciri-ciri buah mana yang sudah matang. Umumnya buah yang sudah matang dan siap di konsumsi sudah lebih empuk sehingga gampang dipecahkan dengan tangan seperti membelah buah manggis. BSD Course memiliki 2 jenis sawo duren yaitu yang jika matang berwarna merah (ada di hole 5) dan yang tetap berwarna hijau pada saat matang (ada di hole 10). Varietas yang ada di hole 10 umumnya memiliki rasa yang lebih manis.

Need to be careful because the sap in the sawo duren is quite a lot, especially in immature fruit. Please try the sawo duren when playing golf at BSD Course.

Perlu berhati-hati karena getah pada buah sawo duren cukup banyak, terutama pada buah yang belum matang. Silahkan mencoba buah sawo duren pada saat bermain golf di BSD Course.

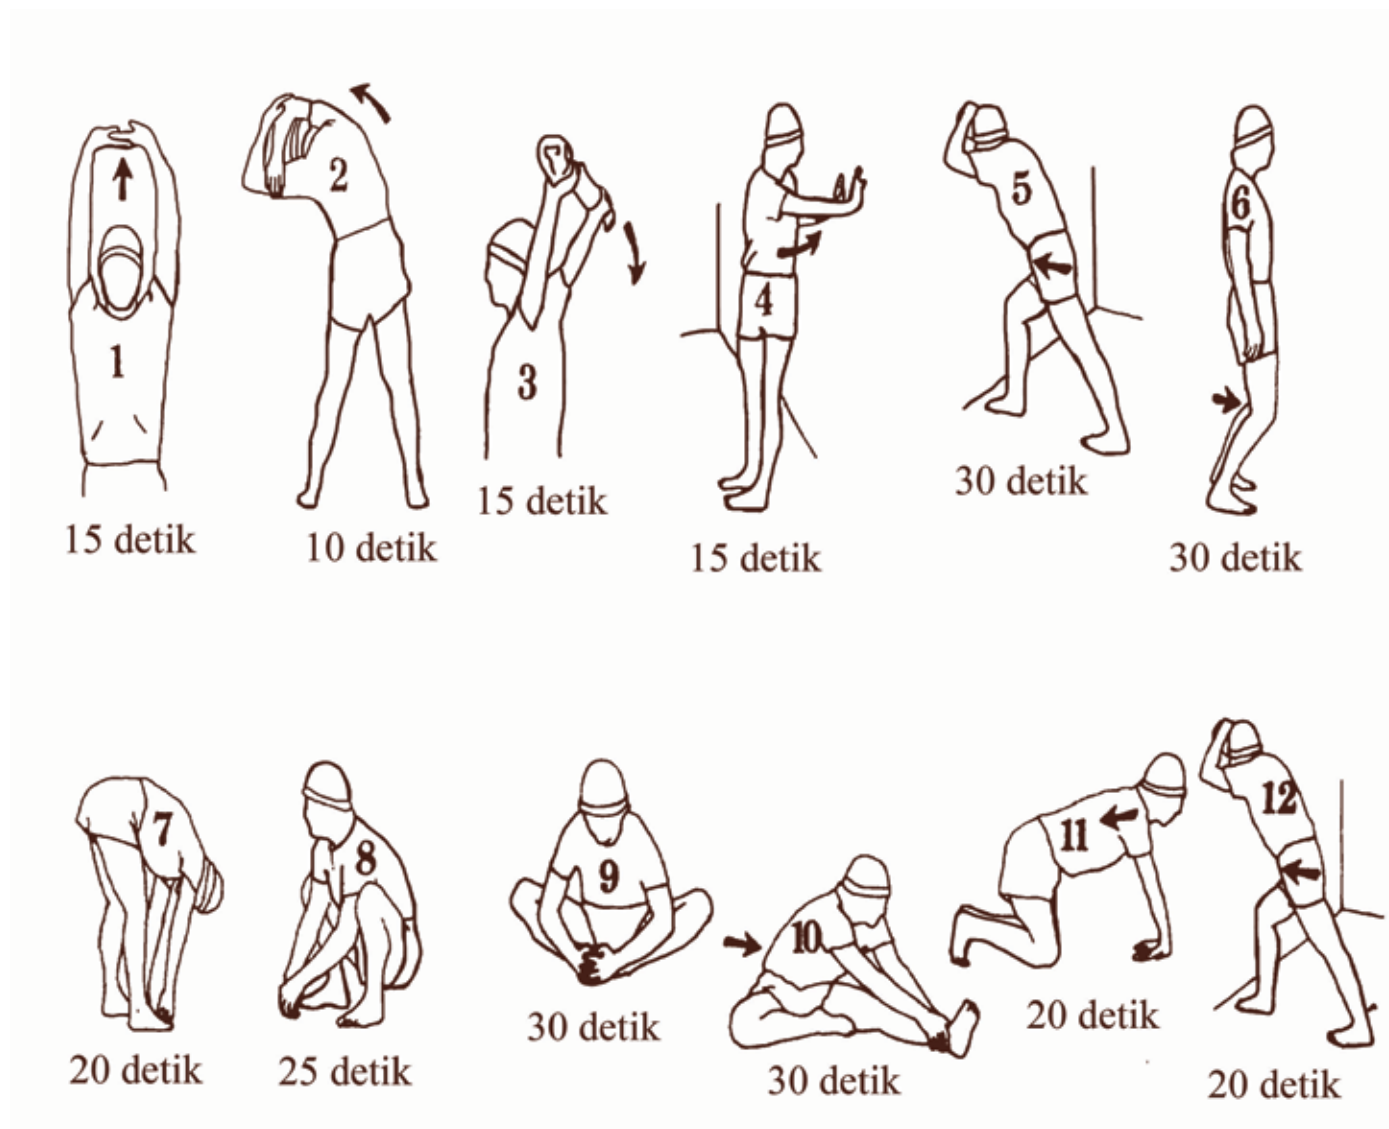

STRETCHING

Stretching is very important for golfers, if golfers do not stretch enough then their muscles will be tight and shortened.

Stretching sangat penting bagi kita, apabila tidak sering melakukannya maka otot akan menegang dan nantinya akan memendek.
