Chairman Message

Dear Members,

Xin Nian Kuai Le !! Have a prosperous and healthy new year to all the Members who are celebrating. I hope everyone is healthy and safe. Our Club keeps monitoring health protocols consistently. We are grateful that BSD and PIK Course employees and caddies have been vaccinated for the booster phase starting this February to ensure that all the members, visitors, employees and caddies are safe when visiting the club. We all hope this situation will be getting better soon.

I would like to sincerely thank all the members who have participated in our Christmas Wish Program last December. Your gifts were a great blessing to the kids in the orphanages.

Progress on the Driving Range BSD Course renovation is still going on and we expect to be fully operational with additional bays, VIP Bay, restaurant and bar in the middle of March 2022. The renovation of the interior of BSD club house is also still on progress. While on the golf course we just started to make over our teeing area to rectangular shape for the next few months. We apologize for your inconvenience.

We are continually conducting course maintenance program regularly to keep both of our golf courses always in great condition.

Thank you to our dear and valued members for your kind attention. Happy Golfing!

Golf Course Maintenance

BUNKERS MAINTENANCE IN BSD COURSE 2021

By Robby Chandra

Menggemburkan pasir bunker dilakukan lebih sering untuk meningkatkan kualitas di permukaan bunker. Kegiatan ini juga diikuti dengan meratakan ketebalan pasir. Curah hujan yang tinggi di BSD course menyebabkan pasir hanyut ke area yang lebih rendah, sehingga secara periodik perlu dipindahkan lagi. Penggemburan pasir bunker yang lebar dan waste bunker dilakukan dengan traktor, sedangkan normal bunker dilakukan dengan alat rotavator.

Loosening the bunker sand is done more often to increase playability on the bunker. This activity is also followed by leveling the thickness of the sand. The heavy rainfall on the BSD course causes the sand to drift to a lower area, so it needs to be moved periodically again. For waste bunker this task is carried out by using tractors, while for normal bunker we use walk behind plow machine to loosen the sand .

Penambahan pasir baru baik di waste bunker dan normal bunker. Sebelumnya pasir dicuci dan disaring sehingga memenuhi standard yang diinginkan, lebih dari 500 m³ pasir bunker telah ditambahkan ke bunker yang ketebalan pasirnya dibawah 15 cm.

The addition of new sand both in the waste bunker and normal bunker. The sand was washed and screened before spreading on bunkers, so the sand specification fit the desired standard, more than 500 m³ of bunker sand was added to bunkers whose sand thickness was below 15 cm.

Beberapa bunker masih tergenang 30 menit setelah hujan deras. Untuk mempercepat serapan air di bunker, beberapa bagian bunker liner (geotextile) diganti dengan jaring. Metode ini mampu menyerap air 5 menit setelah hujan.

Water in several bunkers are still logged 30 minutes after the heavy rain. To accelerate water absorption in the bunker, some parts of the bunker liner (geotextile) are replaced with nets. This method is able to absorb water 5 minutes after it rains.

Di tahun 2021 telah diselesaikan pencucian dan penyaringan pasir di seluruh normal bunker seluas 13.500 m². Pencucian pasir bertujuan membuang lumpur dan tanah yang selama bertahun-tahun masuk ke bunker dan mengotori pasir. Hasilnya pasir bunker lebih putih dan lebih gembur. Penyaringan pasir dengan ayakan ukuran 1 mm akan membuang butiran pasir kasar dan batu kerikil, membuat butiran pasir lebih seragam dan bunker lebih nyaman saat dimainkan.

In 2021, sand washing and screening have been completed throughout the 13,500 m² normal bunker. Sand washing aims to remove mud and clay that for years has entered the bunker and contaminated the sand. After washing process, the bunker sand will be whiter and looser. Sand screening with a 1 mm sieve will remove coarse sand and gravel, making the sand particle more uniform and the bunker more comfortable when playing.

Progress Renovation Driving Range BSD Course

To improve services and facilities to our members and guests, and currently golf is now a popular sport among the young generation, BSD Course is undergoing renovation of the driving range to upgrade our facilities by adding more bays, food & beverage counters and lounge area.

The renovation is still going and will be open in the second week of March 2022. We are sorry for your inconvenience, but please know that all the work and renovation will be worth the wait.

Jika Anda memukul pukulan tee lemah yang mengarah ke kanan (pegolf tangan kanan), posisi finish anda akan menyerupai gambar 6. Anda menggantung ke belakang dan tidak memindahkan berat badan anda ke arah target. Silakan coba langkah Swing Through untuk mulai memukul tembakan lurus dengan lebih banyak kekuatan. Memulai untuk memukul pukulan biasa anda (gambar 1), dekatkan kaki anda (gambar 2), ayunkan swing anda sampai ke atas (gambar 3), mulailah penurunan anda dengan menggeser kaki kiri anda ke kiri (gambar 4), selesaikan ayunan anda dengan bahu kanan anda ke arah target dan kaki kanan anda hampir sepenuhnya menyentuh tanah.

If you hit weak tee shots that goes to the right (right handed golfers) your follow through position will resemble pic 6. You are hanging back and not shifting your weight towards the target. Please try the step through drill to start hitting straight shots with more power. Set up to hit your regular shot (pic 1), put your feet close together (pic 2), swing to the top (pic 3), begin your downsing by shifting your left foot to the left (pic 4), finish your swing with your right shoulder towards the target and your right foot almost totally off the ground.

Teeing Area Solutions

Black Tee

Blue Tee

White Tee

Red Tee

Kebanyakan dari kita tahu ada tee hitam (championship), tee biru (advanced), tee putih (standar), tee merah (forward). Kita harus menghindari penggunaan kata kata tee pria atau wanita karena ada beberapa wanita yang drive lebih jauh daripada beberapa pria. Jadi dari mana anda harus melakukan tee off? Jika drive anda menempuh jarak MINIMUM 250 meter anda harus menggunakan tee hitam, 220 meter menggunakan tee biru, 200 meter menggunakan tee putih, dan sisanya dari tee merah. Bermain dari area tee yang tepat akan membuat permainan lebih seru dan menyenangkan.

Most of us know that there are black tees (championship), blue tees (advanced), white tees (standard), red tees (forward). We should avoid using men or ladies tees because there are some ladies that hit further than some men. So where should you tee off from? If your drives travel a MINIMUM of 250 meters you should use the black tee, 220 meters use the blue tees, 200 meters use the white tees, and the rest from the red tees. Playing from the proper teeing area will make the game much more fun and enjoyable.
